SECTION 2 · CHEAT SHEET

Meet KGP Vibes Cafe, one project for the whole course

Every prompt, command, shortcut and setting from this section, lesson by lesson. Prompts are word for word, as typed on screen.

2.1 Section 2 introduction

Concept lesson: nothing to type, run or set.

2.2 Meet KGP Vibes Cafe

Concept lesson: nothing to type, run or set.

2.3 The owner's brief and the course map

Concept lesson: nothing to type, run or set.

2.4 A website in plain words

Concept lesson: nothing to type, run or set.

2.5 Get the course resources

SETTING — GitHub, the kgp-vibes-cafe repository › Code › Download ZIP

Packs the whole repository into one zip file. No Git and no account needed; the link is in the lecture's resources.

SETTING — Right-click the zip › Extract All › Extract

Unpacks it into a new folder with the same name, right beside the zip.

FOLDER — kgp-vibes-cafe-main › kgp-vibes-cafe-main

The **inner** folder is the project: assets, baseline, source, .gitattributes and the README. Open this one every time.

SETTING — VS Code: File › Open Folder › the inner kgp-vibes-cafe-main › Select Folder

Shows the same folders and files as a tree, only for reading.

SETTING — Restricted Mode, left on

VS Code's careful mode for a folder it has not seen before. Fine while we only read.

2.6 Why we start from these files

FILE **assets/menu-preview.png and source/KGP_Vibes_Cafe_Menu.pdf**
The cafe's real printed menu, as a picture and as a PDF. The agent reads the PDF itself.

FILE **baseline/founder_profile.md and baseline/cafe_profile.md**
Who runs the cafe and what he wants next; the Koramangala outlet's address, hours, seats, busy times, prices, team, and what works and what does not.

FILE **baseline/new_outlet_brief.md**
The owner's wish list for the Indiranagar launch: each need on the left, what we make on the right.

FILE **baseline/menu.csv**
The menu as a sheet: one line per item, the first line names the columns (price, diet, egg, pairing, ingredient cost).

FILE **baseline/sales/orders.csv and baseline/sales/order_items.csv**
Every order with its channel and payment, and the items in each order.

FILE **baseline/earnings/**
Three monthly profit and loss reports, their summary, and earnings_summary.csv.

FILE **baseline/customer_feedback.csv**
Reviews from Google and in-store cards; read a few and the morning queue keeps coming up.

FILE **baseline/owner_inbox/ and baseline/bookings.csv**
Ten emails to the owner, like a customer who waited twenty minutes for a latte, and the table bookings.

FILE **baseline/cafe_faq.md and README.md**
Hours, both addresses, vegetarian and vegan items for the Barista Bot; the read me lists every file.

2.7 Create the cafe project

SETTING

Sidebar: the new project button next to Projects

Opens a folder picker. A project is a folder on your computer; the agent reads and writes inside it.

SETTING

Folder picker: Antigravity Course › kgp-vibes-cafe-main › the inner kgp-vibes-cafe-main › Select Folder

Adds the project to the sidebar, and the new conversation box switches to it.

SHORTCUT

`@` `Enter`

An at sign with part of a file name lists the matching files; Enter attaches the highlighted one as a mention, so the agent reads exactly that file.

PROMPT

```
Read the owner's brief, @new_outlet_brief.md and the menu, @KGP_Vibes_Cafe_Menu.pdf
In plain words, tell me what this cafe sells, what the owner wants from the new
outlet, and what we will make for it. Keep it short.
```

Typed as **@new_outlet** and **@KGP_Vibes**, each picked with Enter. The answer came in about twenty seconds, in three parts: the menu, the owner's goal, and what we will build.

SHORTCUT

`Enter`

Sends the request. The conversation appears under the project and gets a name.

SETTING

Worked for … › Explored files

Opens the agent's steps: it analysed the brief and the menu PDF directly.

2.8 The business in plain words

PROMPT

```
Now read the earnings reports in @earnings and explain the business to the owner in
plain words: the best sellers, the average order, the food cost and the profit. Use
the real numbers and keep it short.
```

An @ mention can name a whole folder: one mention hands the agent all the reports at once.

COMMAND

```
/btw what does food cost mean for a cafe, in one sentence?
```

Typed as **/btw**, Enter, then the question. A side question: answered in its own small panel while the main task keeps running.

SETTING

Close the side answer

Leaves a 1 Side Question note in the message box, to open it again later.

RESULT

Tech Latte, KGP Cold Brew and Talkie Chai lead by money taken; Talkie Chai leads by cups sold

Average order **$7.81** across **3,895** orders; food cost about **29%** of sales; profit about **$5,400** over the three months, a margin of almost 18%.

SETTING

Side panel button, top right of the conversation

Opens files next to the conversation; here the menu PDF from the source folder.

SETTING

Side panel: the maximize button, then the PDF viewer's zoom

The panel takes the whole window and the prices stay readable: Tech Latte $3.50, Talkie Chai $2, Startup Burger $5.

2.9 A one-page plan for the owner

PROMPT

```
Write a one-page launch plan for the new Indiranagar outlet as an artifact, for the owner to read in two minutes: the goal, what we build and in what order, and how we will know it worked.
```

The reply names the artifact, lists the owner's open decisions, and ends with the plan's card.

SHORTCUT `Ctrl+Enter`

Proceed on the plan's card: approves the plan. Not pressed here; first we read it.

SETTING Click the artifact's name in the reply › the side panel's maximize button

Opens the plan beside the conversation, then across the whole window.

SETTING Hover a part of the artifact › the plus button › type › Add Comment

Pins a comment to that exact spot; the part keeps a small comment mark.

COMMENT

```
Use weeks before opening instead of calendar dates, here and in the note at the top.
```

Left on the first phase's heading.

PROMPT

```
Also add a short section on opening week offers.
```

Comments wait above the message box (**1 Comment**) and go to the agent with the next message.

SHORTCUT `Ctrl+M`

Or the microphone button: say a message instead of typing it, and the App writes your words into the box.

RESULT The agent edited the same artifact

The phases now count down in weeks before opening, a new Opening Week Offers section holds three offers, and the budget still totals **$1,500**.
